P&D GIS How-To-Guide
Cannabis Storefront Retail

The interactive GIS web-based map is available [here](#).

Once you have accessed the map, begin by clicking on the Bookmark icon on the top right corner and select the area that you are interested in, as shown below:

Next, click on the Layer List icon and select the following layers:

- 750-feet Buffer of Schools, Day Cares, and Youth Centers
- Parcels in Zones Allowing Cannabis Storefront Retail
- Sensitive Receptors
If you want to know what a specific zoning designation is for a parcel, you can zoom in on the map (or type in the address in the field on the top left corner) and click on the parcel and it will tell you what the zoning is. Some parcels have multiple pages within the pop-up box. You can switch between these information pages by clicking on the arrow on the top right corner of the pop-up box, as shown below:

The pop-up box includes an information page that provides a link to access Google Maps. Click on this link to see an aerial map of the subject parcel.
In order to get a street view of the subject parcel, click on, hold, and drag the small, yellow person icon and place it on the street in front of the parcel you would like to view.
